## Guide:

- 1 .Make sure you're in the main branch locally and ``git pull origin main`` any pending changes
- 2 .Make a new branch per the recommended branch name below (`git checkout -b ...`)
- 3 .Fill in the items in the worksheet below (save as often as necessary)
- 4 .Once finished, export the worksheet
- 5 .Add the output file to any location of your choice in your repository folder
- 6 .Check that git sees it via ``git status``
- 7 .If everything is good, continue to submit
  - 1 .Track the file(s) via ``git add``
  - 2 .Commit the changes via ``git commit`` (don't forget the commit message)
  - 3 .Push the changes to GitHub via ``git push`` (don't forget to refer to the proper branch)
  - 4 .Create a pull request from the homework related branch to main (i.e., main <- "homework branch")
  - 5 .Open and complete the merge of the pull request (it should turn purple)
  - 6 .Locally checkout main and pull the latest changes (to prepare for future work)
- 8 .Take the same output file and upload it to Canvas
  - 1 .\*This step is new since GitHub renders the PDF as an image the links aren't clickable so this method works better
  - 2 .\*Remember, the github process of these files are encouragement for your tracking of your progress

Response:

I've learned a lot about HTML CSS and JS. I knew the basics such as things like the tags, comments, the general writing style, etc. However, I learned a lot and it was a good refresher. I learned more about DOM in JS and the methods to retrieve data from the html or add/edit elements directly from the JS. For CSS I learned many new things such as the attribute selector. I didn't know this existed, this selector can save a lot of time as I wouldn't have to make id's or class in some cases. I also learned about HTML and how semantics are useful as they are used for accessibility such as for the blind (text-to-speech).

I understand most of the material however, I have to reference all the tables on w3schools with the methods/functions/tags/styles. However, I find the things like display layouts (flex, float, grid) a little confusing which I'll have to study more.
